F NEWLINE : Le plafond révolutionnaire.

Le plafond tendu PVC perforé permet de réaliser des plafonds plats ou en déformation. Il peut être utilisé directement sans arrivée de lumière au-dessus du plénum (perforations, trous noirs) en transparence naturelle ou avec un plafond "NEWMAT" translucide qui lui donne un aspect de dalle de verre éclairée (perforations, trous lumineux).

USA NEWLINE: A revolutionary technique.

The PVC perforated stretch ceiling system can create curves, angles, domes, and other various shapes. It can be used without any light source from behind (dark perforations), in natural transparency, or backlit with or without a "NEWMAT" translucent ceiling which has a frosted glass look (luminous perforations).

D NEWLINE: Die revolutionäre Spanndecke.

Die gelochte Spanndecke NEWLINE ermöglicht flache oder gewölbte Decken zu realisieren. Diese Spanndecke kann ohne Hinterbeleuchtung installiert werden. Die gelochte Fläche wirkt dann wie eine glänzende Lochblechdecke (schwarze Löcher). Sie kann auch allein oder im Zusammenhang mit einer "NEWMAT" transparenten Spanndecke inklusive Hinterbeleuchtung installiert werden. Die Wirkung ist dann die einer Lichtdecke (beleuchtete Löcher).

NL NEWLINE : Het revolutionair plafond.

Het geperforeerd PVC spanplafond laat toe om vlakke plafonds te realiseren. Het kan gebruikt worden direct zonder toevoer van licht onder het plakwerk, dit geeft een natuurlijke transparantie. Het kan ook gebruikt worden met een NEWLINE waar het licht door de kleine perforaties komt.

E NEWLINE : El techo revolucionario.

El techo tendido PVC perforado permite realizar techos planos o en deformación. Puede ser utilizado directamente sin llegada de luz encima del plénum (perforaciones, huecos negros) en transparencia natural o con un techo "NEWMAT" translúcido que le da un aspecto de losa de vidrio iluminada (perforaciones, huecos luminis).

I NEWLINE : Il soffite rivoluzionario.

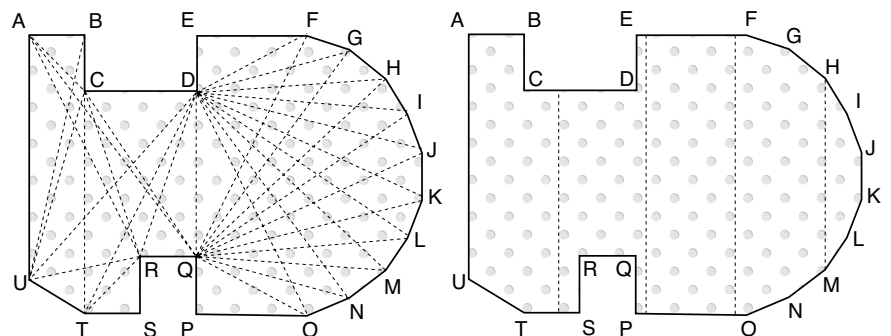

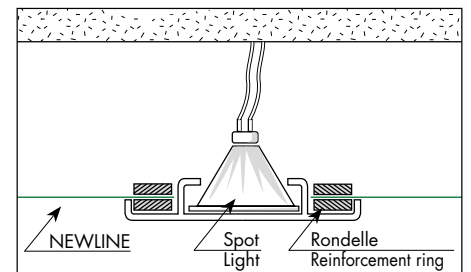

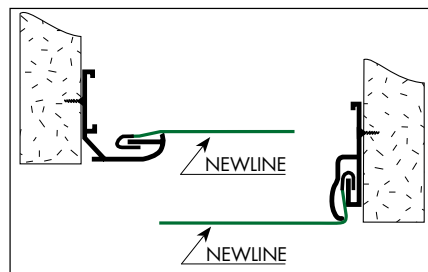

Il rivestimento tappezzato in PVC perforato permette di realizzare soffitti piatti o in deformazione. Può venire utilizzato direttamente senza apporto di luce al di sopra del soffitto (perforazioni, fori neri) in trasparenza naturale o con un soffitto "NEWMAT" traslucido che gli conferisce un aspetto di lastra di vetro illuminata (perforazioni, fori luminosi).

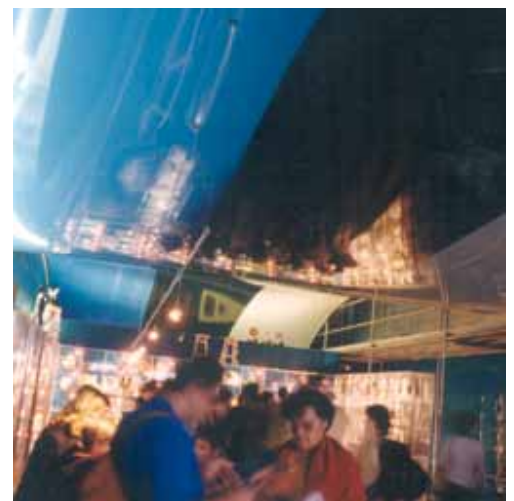

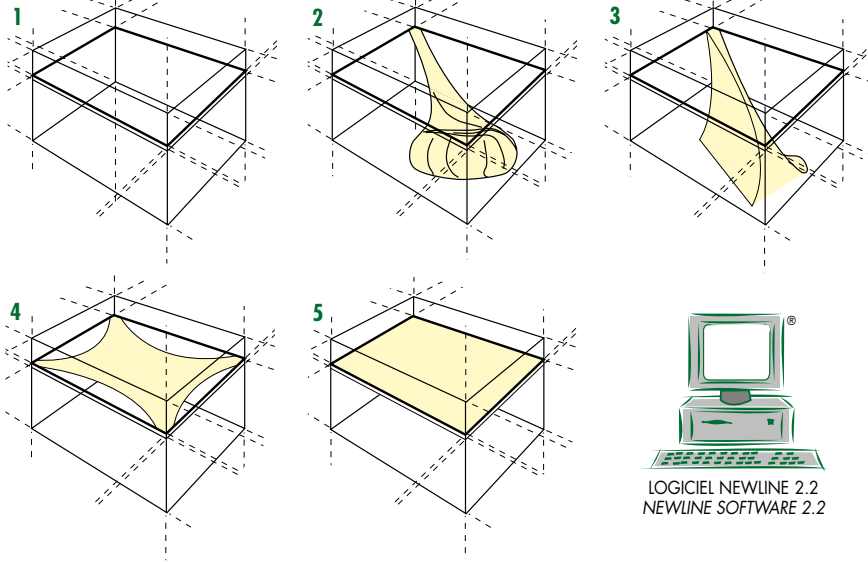

P NEWLINE : O tecto revolucionário.

O tecto estendido em PVC perfurado permite realizar tectos planos ou em deformação. Pode ser utilizado directamente sem entrada de luz por cima do plano (perfurações, furos negros) em transparencia natural ou com um tecto "NEWMAT" translúcido que lhe dá um aspecto de placa de vidro iluminada (perfurações, furos luminosos).

RUS NEWLINE : потолок - воплощение самых смелых творческих идей.

Натяжной перфорированный потолок из ПВХ можно установить в помещении любой формы. Потолок можно использовать как со встроенным освещением, так и без него. Потолок без встроенных светильников смотрится также оригинально (перфорированные отверстия имеют черный цвет), как и потолок, установленный под полупрозрачный потолок со встроенным освещением. Тогда потолок приобретает вид освещенной стеклянной плитки (этот эффект создается благодаря свету, падающему через отверстия в перфорированном полотне).

F
 1 - Installation du profil sur les murs.
 2 - Dépliage du plafond.
 3 et 4 - Accrochage des angles.
 5 - Accrochage périphérique. Finition.
 Fin de l'installation.

USA
 1 - Fastening the rails to the perimeter walls.
 2 - Unfolding the ceiling.
 3 and 4 - Inserting the corners.
 5 - Inserting the perimeter; the installation is complete.

D
 1 - Montage der Wandleiste.
 2 - Aufrollen der Spanndecke.
 3 und 4 - Eckfixierung der Decke.
 5 - Fixierungen der Seiten. Vollendung der Montage.

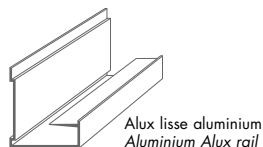

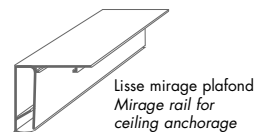

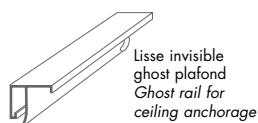

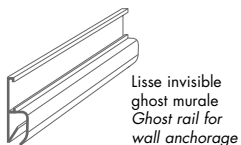

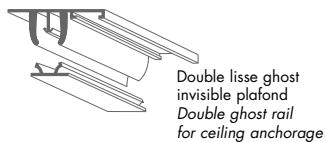

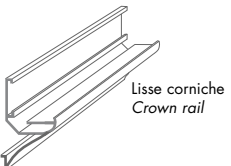

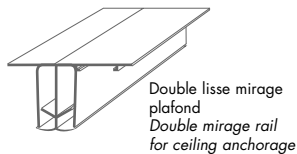

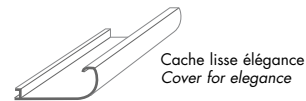

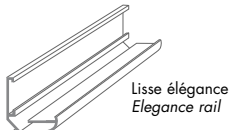

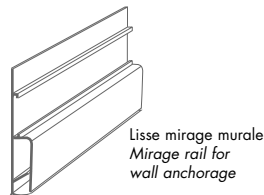

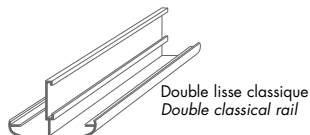

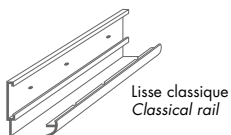

NL
 1 - Installatie van het profiel tegen de muren.
 2 - Ontvouwen van het plafond.
 3 en 4 - Vastmaken van de hoeken.
 5 - Vastmaken van de randen, afwerking.
 Einde van de installatie.
 1 - Instalación del perfil en las paredes.
 2 - Despliegue del techo.

E
 3 y 4 - Suspensión de los ángulos.
 5 - Suspensión periférica. Acabado.
 Fin de la instalación.

I
 1 - Installazione del profilo sui muri.
 2 - Dispiegatura del soffitto.
 3 e 4 - Come agganciare gli angoli.
 5 - Aggancio lungo il perimetro. Finitura.
 Termine dell'installazione.

P
 1 - Instalação do perfil em cima das paredes.
 2 - Desdobragem do tecto.
 3 e 4 - Fixação dos cantos.
 5 - Fixação periférica, acabamento.
 Fim da instalação.

RUS
 1 - Установка профиля на стенах.
 2 - Развертывание потолка.
 3 и 4 - Закрепление углов.
 5 - Закрепление потолка по периметру стен.
 Отделочные работы. Завершение работ по установке.

F NEWLINE : le souci du détail.

Caractéristiques :

- Matière colorée dans la masse, traitée anti UV.
- Matière insensible au désinfectant.
- Protection contre le feu : classement M1/B1/Fire 1.
- Produit à mémoire permettant après une déformation éventuelle de reprendre sa forme initiale (supporte un allongement de 150%).
- La perforation assure une ventilation du plénum et permet un désenfumage éventuel.
- Assemblé par soudure haute fréquence.
- Profil mural qui permet l'accrochage du profil périphérique.
- Epaisseur de 17 centième avec un poids de 200 gr au m².
- Matériau résistant aux agressions chimiques et à l'humidité car matière homogène et non-poreuse.

Grande adaptabilité :

- Plafond démontable.
- Possibilité d'inclusion de spots lumineux, de luminaires et de climatisation ainsi que de tout autre passage technique.
- Choix esthétiques et techniques permettant l'embellissement de lieux différents : piscines, centres commerciaux, salles polyvalentes, bâtiments industriels... en plafond plat ou en déformation.

USA NEWLINE : All details covered.

Characteristics:

- Mass tinted with UV protection.
- Not affected by desinfectants (chlorine etc.).
- Class A non toxic fire rating.
- 100 % memory allowing it to return to original state even after deformation from leaks or others.
- Perforations allow for ventilation of plenum and exhaustion of potential smoke.
- Welded together by high frequency.
- Perimeter rails allow for the harpoon insertion.
- Thickness of 0.01", weight of 0.65 ounces per square foot.
- Non porous and resistant to humidity and chemicals.

Flexibility of the system:

- Fully accessible ceiling.
- Can be perforated to accommodate lights, HVAC, and other mechanical.
- Numerous technical and aesthetic options to complement swimming pools, shopping centers, industrial buildings, restaurants, offices etc...with flat or shaped ceilings.

*Les plafonds tendus NEWMAT sont garantis 10 ans contre toute rupture de soudure / NEWMAT Stretch Ceilings are guaranteed for 10 years against seam ruptures.

**NL 6 et NL 55 : Non classé / According to the standards in effect / Nicht klassiert / No clasificado.

NEWMAT se réserve le droit de modifier ou supprimer certains coloris sans préavis. / NEWMAT reserves the right to modify or withdraw certain finishes without notice. - NB : Slight colour differences may occur between batches.

D NEWLINE : Die Perfektion bis ins Detail.

Eigenschaften :

- Das Material ist in sich gefärbt und UV beständig.
- Das Material ist beständig gegen Desinfizierungsmittel.
- Die Brandklasse ist B1 nach DIN 4102.
- Es ist flexibel und nimmt immer wieder die Ursprungsform ein.
- Die Dehnungsfähigkeit beträgt 150%.
- Die Lochung ermöglicht eine Hinterbelüftung und eine Rauchabzug der Spanndecke.
- Die Randleiste ermöglicht das Einhängen des Randkeder.
- Die Stärke entspricht 0,17 mm und das Gewicht 200 Gramm pro qm.
- Das Material ist Chemikalien – und Feuchtigkeitsbeständig, da es homogen und nicht porös ist.

Grosse Anpassungsfähigkeit :

- Die Decke ist leicht demontierbar.
- Folgende Varianten sind möglich : Einbaustrahler, Langfeldleuchter, Klimaanlage, Luftschächte und alle technischen Durchbrüche.
- Vielfältigkeiten der Farden und technischen Möglichkeiten
Verschönerungen folgender Beispiels-Objekte : Schwimmbäder, Einkaufszentren, Sporthallen, Industriegebäude, u.v.a...

NL NEWLINE : De zorg voor detail.

Karakteristieken :

- Gekleurd in de massa, behandeld tegen UV straling.
- Materie ongevoelig voor schoonmaakproducten.
- Brandveilig: klassement M1/B1/FIRE1.
- Produkt met geheugen: na een deformatie vindt het zijn oorspronkelijke vorm terug (kan 150% megeven).
- De perforaties zorgen voor een ventilatie.
- Op maat gemaakt door een hoge frequentie soldering.
- Het profiel wordt aan de muur vastgemaakt.
- Dikte: 17 micron met een gewicht van 200 gr/m².
- Materiaal bestand tegen chemische middelen en vochtigheid door de homogene materie en door de niet-doorlatende eigenschappen.

Grote aanpasbaarheid :

- Demonteerbaar plafond.
- Mogelijkheid om spots in te bouwen, alsook klimatisatie.
- Uitgebreide keuze voor volgende plaatsen : zwembaden, commerciële centra, polyvalente zalen, industriële gebouwen, vlakke of gedeformeerde plafonds.

NEWMAT se réserve le droit de modifier ou supprimer certains coloris sans préavis. / NEWMAT reserves the right to modify or withdraw certain finishes without notice. - NB : Slight colour differences may occur between batches.

E NEWLINE : La preocupación del detalle.

Características :

- Materia coloreada en la masa, tratada anti UV.
- Materia insensible al desinfectante.
- Protección contra el fuego : clasificación M1/B1/FIRE 1.
- Producto con memoria que permite, después de una posible deformación, retomar su forma inicial (soporta un alargamiento de 150%).
- La perforación garantiza una ventilación del pleno y permite desahumar si es necesario.
- Ensamblado con soldadura de alta frecuencia.
- Perfil mural que permite el enganche del perfil periférico,
- Espesor de 17 centésimos con un peso de 200 gr por m².
- Material resistente a las agresiones químicas y a la humedad ya que la materia es homogénea y no porosa.

Gran adaptabilidad :

- Techo desmontable.
- Posibilidad de inclusión de spots luminosos, alumbrados y de climatización así como cualquier recorrido técnico.
- Opciones estéticas y técnicas que permiten el embellecimiento de lugares muy diferentes : piscinas, centros comerciales, salas polivalentes, edificios industriales...en techo plano o en deformación...

I NEWLINE : L'accuratezza dei dettagli.

Caratteristiche :

- Materia tinta in pasta, trattata anti-UV.
- Materiale insensibile al disinfettante.
- Protezione antifiamma : classificazione M1/B1/FIRE 1.
- Prodotto dotato di memoria, capace – dopo eventuale deformazione – di riprendere la sua forma iniziale (soporta un allungamento del 150%).
- La perforazione garantisce la ventilazione del soffitto permettendo l'eventuale eliminazione del fumo.
- Assemblaggio : mediante saldatura ad alta frequenza.
- Profilo murale che permette l'aggancio del profilo periferico.
- Spessore : 17cm – peso 200g/m².
- Materiale resistente alle aggressioni chimiche e all'umidità perché la materia è omogenea e priva di pori.

Grande adattabilità :

- Soffitto smontabile.
- Possibilità d'inserimento di spot luminosi, lampadari e d'aria condizionata nonché di qualsiasi altro passaggio tecnico.
- Scelte estetiche e tecniche che permettono alla decorazione di luoghi molto diversi: piscine, centri commerciali, sale polivalenti, edifici industriali... in soffitto piatto o in deformazione.

- Escolhas estéticas e técnicas que permitem embelezar locais miuto diferentes : piscinas, centros comerciais, salas polivalentes, edificios industrials...em tecto plano ou em deformação.

RUS NEWLINE : Описание.

Характеристики

- Материал полностью покрашен с применением антиультрафиолетовой обработки, позволяющей полотну сохранить свой первоначальный цвет в течении долгого времени.
- Материал можно обрабатывать дезинфицирующими средствами.
- Материал огнеупорен, классификация M1/B1/ Fire1.
- При случайной деформации материал способен восстановить свою первоначальную форму (выдерживает растяжение до 150%).
- Перфорация обеспечивает хорошую вентиляцию даже в случае сильного задымления помещения.
- Полотно соединено швом высокой частоты.
- Настенный профиль позволяет прикрепить потолок по периметру стен.
- Толщина 17/100 мм при весе 200 гр/кв.м.
- Материал устойчив к химическим реакциям и влаге благодаря своей однородной и непористой структуре.

Практичность

- Потолок демонтируется.
- Возможна установка светильников, вентиляционных решеток, кондиционеров и других различных технических систем.
- Большая цветовая гамма, технические характеристики материала, возможность установки потолка на различных уровнях и способность профиля принимать форму стен на которые он устанавливается – все это позволяет украсить любое помещение, бассейны, торговые центры, общественные и промышленные здания.
